During the early make a common man under the perchastic spots of the spots

abers earning work or pay credits repairing float

The Work or Pay program was started in 1978 for several reasons, forestered of which was to provide more labor for the Chib's projects. It is certainly not clear from the noise for the Chib's projects. It is certainly not clear from the noise the worked band, logical clearchility for the private good of the Chib. In fact, the noise repeat again and again complaints unter? clinic that when most of the bosts were wooden, and unterstand that when most of the bosts were wooden, and work to be considered to the contract of the contract of the until the contract of the contract of the contract of the contract until the contract of the united was the contract of the co

The clubbouse developed much the same way that the docks dick slowly, steading, always through musty the labor of the membership, and remarkably without a master plan or loog-range plan. To be sure there had been a "Long Range Planning Committee" for almost as long as the Club had been in existence, they uptuit the Club began parting aside mounts to the "Long Range" slows, most of the Club building down to the "Long Range" slows, most of the Club building down the "Long Range" slows, most of the Club building down the "Long Range" ("See, several lames the notes do refer to consideration of having the Commodore serve more than a one year term, but "not this year.")

The first five years had the members finishing the interior of the Calebones. Floors were finished, partitions were exceld, ceilings were plastered. In 1959, a member who happened to be a Couprenty Instructor as a Tradis School papered to be a Couprenty Instructor as a Tradis School cover the lower deck facing the river. Some "Long Range" thought process was used because it was built to be "strong enough to accept a second floor load in the future". In the mid-O'd happened to the coupre of the process was recorded from load in the future" in the mid-O'd happened to the process was recorded floor and the future "In the mid-O'd happened to the process was recorded floor and the future" in the mid-O'd happened to the process was recorded floor and the future of the print of a variety to be replaced.

1983 when the second floor addition was eventually framed, it had deteriorated to be point of having to be replaced.

The lower deck of the proch provides the Cub with the single most often used meeting and to unguing place at the Club during the boating season. Before the Winch House was built (at 1986), the area under the proche provided storage space for the Club's forti-lift and donkeys during the winter season (Clystophysen some panels were exercical and distrainted each start of the club's forti-lift and donkeys during the winter season which was the compared to the club of the c

In 1982 through 1984 saw the second floor addition built. A Contractor was hired for the footings, framing, siding and roofing. Club members did the drywall, flooring, viny wallpaper, painting, electrical work, finish carpentry, and removing and reframing the original wall between the hall and

Hard on the heels of the addition came the building of the new Winch House in 1986. Its primary purpose was to take better care of our hauling equipment. We had acquired some more and larger pieces of equipment and with this equipment came spare engines and whatnot of venerable age and somethest uncertainty linears. The present of t
